SUBJECT: 2020 Racial Profiling Report

Date: March 3, 2021

The San Antonio Police Department (SAPD) collected racial profiling data for 2020 pursuant to state law and regulation. Further, state law requires that the Department report to the “governing body of the agency” all data collected for the 2020 calendar year and electronically submit the racial profiling data to the Texas Commission on Law Enforcement (TCOLE).

In order to ensure the accuracy and integrity of the report we contracted with Brian L. Withrow, Ph.D. to conduct an independent analysis of the data collected by the San Antonio Police Department during 2020. Dr. Withrow is one of the nation’s leading authorities on racial profiling. He has published two textbooks and numerous scholarly articles on this topic and has conducted racial profiling studies for police departments throughout the nation.

The reporting requirements exclude pedestrian contact data, therefore, our analysis and results are based on data from traffic stops occurring between January 1 and December 31, 2020. By department, these totals are as follows: SAPD – 138,180; Park Police – 1,018; and Airport Police – 194.

The percentages, by department, of these stops, with respect to the race/ethnicity of the drivers provided to TCOLE, are as follows.

	Hispanic/ Latino	Caucasian/ White	African- American/ Black	Asian	Alaskan/ American Indian
SAPD	50.61	36.18	11.64	1.47	0.10
Park Police	44.99	47.05	7.47	.049	0.00
Airport Police	34.02	50.52	13.40	2.06	0.00

Based on Dr. Withrow’s independent analysis, there is no evidence suggesting that the City of San Antonio is engaging in a pattern or practice of racial profiling among city residents or non-residents.

I am confident we have complied with the law to the fullest extent possible for calendar year 2020 and have continued to improve our collection and analysis of the racial profiling data gathered.

Overall, the evidence and documentation in the current report shows that the Airport Police, Park Police and San Antonio Police Departments are in compliance with existing mandates associated with racial profiling laws set forth by the State of Texas.

If you have any questions or require additional information, please contact me at 210-207-7360.

Sincerely

William P. McManus

EXECUTIVE SUMMARY AND INTRODUCTION

February 25, 2021

San Antonio City Council
P.O. Box 839966
San Antonio, Texas 78283

Dear Distinguished Members of the City Council:

In 2001, the 77th Texas Legislature passed S.B. 1074 in an attempt to address racial profiling by law enforcement officers. On June 19, 2009, during the 81st Regular Session, H.B. 3389 was signed by the Governor of Texas and became effective on September 1, 2009. House Bill 3389 changed the racial profiling data collection and reporting requirements for Texas law enforcement agencies. Among other changes, H.B. 3389 required law enforcement agencies to: (1) alter their data collection procedures and methods beginning in 2010, and (2) report such data electronically to the Texas Commission on Law Enforcement (TCOLE) using a mandatory format defined by the department's Tier classification. To insure compliance with Texas law, the San Antonio Police Department (SAPD) entered into a contract with me to analyze its traffic stop data and present a report to city's law enforcement and civilian executives on racial profiling. I assisted the SAPD in complying with the racial profiling data collection and reporting requirements mandated by H.B. 3386.

The substantive report begins in Section II with the text of H.B. 3389. This is followed by a series of TCOLE documents pertaining to the data collection and reporting requirements, exemptions, and Tier classifications. In the next section (III) 139,392 traffic stops from three agencies were analyzed: San Antonio Police Department (138,180 traffic stops), Park Police Department (1,018 traffic stops), and Airport Police Department (194 traffic stops). The data are presented in the format consistent with TCOLE's mandated reporting requirements. Section III concludes with an analysis of racial profiling complaints from the San Antonio Police Department, Park Police Department, and Airport Police Department. In compliance with H.B. 3386, Section IV presents each department's policies and procedures that inform the public on how to file a complaint alleging racial profiling. These are followed by the racial profiling training policies from each department. Here again, these policies are presented in compliance with H.B. 3386.

The San Antonio Police Department, Park Police Department, and Airport Police Department are in compliance with the state laws relating to the collection and reporting of racial profiling data at the Full Reporting level. Based on the independent analysis conducted by me, there is no evidence suggesting that these departments are engaging in a pattern or practice of racial profiling among city residents or non-residents

Respectfully submitted,

Brian L. Withrow

TEXAS LAWS ON RACIAL PROFILING

Intentionally left blank

Texas Occupations Code 1701.164 specifies that TCOLE collect incident-based data in accordance with the [Code of Criminal Procedure Article 2.131 – 2.138](#) . Chief administrators of law enforcement agencies that meet the criteria must submit racial profiling reports to ***their governing body***, as well as TCOLE.

Each agency must file an **annual** online report by selecting and completing the reporting option that applies to their particular situation. Reports are filed online through the [TCOLE Department Reporting System \(DRS\)](#). The reporting period for the **previous** year begins on January 1 of the current year and ends on March 1 of the current year.

The Reporting options are:

1. **Exempt** - Agencies that do not routinely make motor vehicle stops should fill out the 1 page online exempt status form. The exempt status report contains agency general public contact information for questions about its racial profiling filing status. Some agencies are not required to file annual reports.
2. **Full Reporting** - Agencies that routinely perform traffic stops or motor vehicle stops must file by online report. The online report requires the completion of agency general public contact information and requires completion of **both**:
 - a 1 page online form about the numbers of motor vehicles stops made **and**
 - uploading a separate PDF document containing a statistical analysis of its motor vehicle stops compared to the gender and ethnic population of the agency's reporting area. The second document must also contain a statement as to if racial profiling complaints were made against the agency and if so, a listing of all racial profiling complaints and the corresponding resolutions.

III. Data Analysis and Results

TRAFFIC STOP ANALYSIS AND RESULTS PRESENTED IN STANDARD TCOLE FULL REPORTING BY AGENCY: SAN ANTONIO POLICE DEPARTMENT, PARK POLICE AND AIRPORT POLICE

San Antonio Demographics/Characteristics

San Antonio, Texas is the seventh largest city in the United States with 2,547,927 residents.¹ The San Antonio Police Department (SAPD) provides policing services for the entire incorporated area of City of San Antonio. In addition, the Chief of the San Antonio Police Department also serves as the Chief of the Park Police Department and the Airport Police Department.

Each year the SAPD receives in excess of one million calls for service. To address this demand for services police officers are stationed in six strategically located substations throughout the community, at the airport and in various city parks.

Demographically, San Antonio is highly diverse. The largest percentage of residents identify themselves as Hispanic or Latino (55.64 percent). The next largest group of residents identify themselves as White or Caucasian (33.29 percent). The remainder of the residents identify themselves as African-American or Black (6.49 percent), Asian (2.44 percent), or Other (2.15 percent).²

Substantive Changes in Racial Profiling Data Collection and Reporting

Before proceeding with the results, it is worth discussing the manner in which racial profiling data are collected and reported. This process has changed dramatically over the past several years. The original reporting requirement (SB 1074) was passed in 2001 and mandated annual reporting by all policing agencies of traffic and pedestrian stops. House Bill 3389 (2011) made many important and substantive changes. These changes include:

- The current law requires police officers to report whether they were aware of a driver's race or ethnicity prior to initiating the stop. The previous law did not require this information.
- The current law requires police departments to record information about the drivers involved in traffic stops. The previous law required departments to also record information about the pedestrians stopped by the police.
- The current law exempts police departments from reporting raw counts if their patrol cars are equipped with in-car cameras. Even though SAPD patrol cars are equipped with in-car cameras, the department chooses to fully report its data in the Tier 2 format which includes raw counts and detailed information about traffic stops. This also includes demographic information about the drivers.

In 2017, the Texas Legislature amended the statute requiring annual racial profiling reports. These changes include;

- An elimination of the "Middle Eastern" ethnicity category. The United States Census counts individuals of Middle Eastern ethnicity as "Caucasian". This change enables researchers to develop more accurate benchmarks (i.e. estimates of the racial/ethnic proportions within the driving population).

¹ Population estimates are from the Texas Demographic Center for the San Antonio/New Braunfels MSA for 2019. At the time this report was completed the 2020 United States Census data was not yet available.

² The Texas Demographic Center does not report Native-American and multi-racial individuals as does the United States Census Bureau.

- The category reporting whether an arrest was made subsequent to the stop was expanded to provide more insight into enforcement decisions.
- “State highway” was added as an attribute to the location of the stop variable.
- An additional category to report incidents involving the use of force resulting in bodily injury was added to the analysis.

In 2020, the Texas Commission on Law Enforcement implemented a major change by requiring departments to divide more activity categories by the race or ethnicity of the driver.

The San Antonio, Park and Airport Police Departments are in full compliance with all current data collection protocols and reporting standards.

Official Data

This analysis is based on 139,392 recorded traffic stops occurring from January 1 through December 31, 2020. Results are presented in the required Full Reporting TCOLE protocol and reflect agency specific characteristics, such as gender, race/ethnicity, reason for the stop, and other variables. Note that the San Antonio Police Department reports 138,130 traffic stops while the Park and Airport Police report 1,013 and 194 traffic stops, respectively. The following tables represent the racial profiling data collected and reported by the San Antonio, Park and Airport Police Departments for calendar year 2020. Additional Analysis

Traditional racial profiling analysis involves making a comparison between the racial and ethnic proportions within two populations - the overall driving population and the population of drivers that are actually stopped. To do this one must estimate the racial and ethnic proportions within the overall driving population. Unfortunately, it is not possible to definitively measure the racial and ethnic proportions with the overall population of drivers in a large and diverse community. As a result researchers often use proxies to estimate the driving population. The most frequently used proxy is the residential population. The logic of this method is based on the notion that the driving population closely approximates the residential population. In many research contexts this may be a valid assumption, however, there are several factors suggesting this may be a rather unreliable method, particularly in San Antonio. First, the residential population does not count transient drivers, i.e. individuals who drive in a community but do not live there. The major transportation systems (e.g. interstate highways, airports, major state highways, etc.) within San Antonio suggest that the transient population in San Antonio may be very different than its residential population. Second, the residential population in most communities is not equally distributed with respect to race and ethnicity. Some neighborhoods are principally populated by individuals from a single racial or ethnic group. Third, closely associated with the previous point, police patrol resources are not equally distributed throughout a community. Patrol officers are deployed on the basis of demand as measured by calls for service or the crime rate within a neighborhood. This means that some neighborhoods are routinely assigned more police officers than others. If these neighborhoods also happen to be principally populated by individuals from a single racial or ethnic group then these individuals are inadvertently at a higher risk of being stopped. Finally, the residential population cannot differentiate between drivers with respect to their propensity for getting stopped by the police. For example, a young Caucasian man who works as a delivery driver is likely more at risk of being stopped by the police than his elderly Caucasian grandfather who drives only occasionally. Within the residential population these two individuals these two individuals each count equally as one Caucasian man despite their differential driving exposure.

These measurement challenges notwithstanding, it is at least important to recall the racial and ethnic proportions within the residential population. As mentioned previously, the largest percentage of residents identify themselves as Hispanic or Latino (55.64 percent). The next largest group of residents identify themselves as White or Caucasian (33.29 percent). The remainder of the residents identify themselves as African-American or Black (6.49 percent), Asian (2.44 percent), or Other (2.15 percent).

The analysis reveals that Hispanic or Latino drivers represent 55.64 percent of the residential population and;

- 50.61 percent of the traffic stops made by the San Antonio Police Department,
- 44.99 percent of the traffic stops made by the San Antonio Park Police Department, and
- 34.02 percent of the traffic stops made by the San Antonio Airport Police Department.

The analysis reveals that Caucasian or White drivers represent 33.29 percent of the residential population and;

- 36.18 percent of the traffic stops made by the San Antonio Police Department,
- 47.05 percent of the traffic stops made by the San Antonio Park Police Department, and
- 50.52 percent of the traffic stops made by the San Antonio Airport Police Department.

The analysis reveals that African-American or Black drivers represent 6.49 percent of the residential population and;

- 11.64 percent of the traffic stops made by the San Antonio Police Department,
- 7.47 percent of the traffic stops made by the San Antonio Park Police Department, and
- 13.40 percent of the traffic stops made by the San Antonio Airport Police Department.

The analysis reveals that Asian/Pacific drivers represent 2.44 percent of the residential population and;

- 1.47 percent of the traffic stops made by the San Antonio Police Department,
- 0.49 percent of the traffic stops made by the San Antonio Park Police Department, and
- 2.06 percent of the stops made by the San Antonio Airport Police Department.

The following table summarizes these results and compares the percentage of stops and residents by racial/ethnic categories.

Traffic stops (by race/ethnicity) compared against the overall residential population (2020).

	Hispanic/ Latino	Caucasian/ White	African- American/ Black	Asian	Other
Percent of overall residential population	55.64	33.29	6.49	2.44	2.15
SAPD	50.61	36.18	11.64	1.47	N/A
Park Police	44.99	47.05	7.47	0.49	N/A
Airport Police	34.02	50.52	13.40	2.06	N/A

African-American drivers appear to be over-represented in traffic stops conducted by all three departments. These analyses, however, cannot confirm a consistent pattern or practice of racial profiling. It is important to note that an allegation of racial profiling cannot be sustained unless it can be established that the officer knew the driver’s race or ethnicity prior to the stop and was influenced by *racial animus* in the decision to initiate a traffic stop. The data reveals that in only a very small percentage of cases does a police officer even know the race or ethnicity of the driver prior to the stop. In addition, given the complexities associated with how and where police officers are deployed, racial and ethnic segregation patterns in metropolitan areas and other factors it is not possible to suggest a pattern and practice of racial profiling existing in any of these departments.

It is important to note that the data in the above table are somewhat unreliable with respect to the San Antonio Park and Airport Police Departments. Collectively, the total number of stops initiated by officers from these two departments represent 1,212 or 0.87 percent of the total number of stops initiated by the officers from all three of the departments represented in this analysis. This small number of stops cannot produce a reliable pattern of stops with respect to the race and ethnicity of the drivers. It would appear that movement restrictions imposed by the COVID-19 pandemic may have affected routine police activities.

In years past this analysis has also included an assessment of stops by race and gender. The following table represents the traffic stops for each department by the race and gender of the driver. Here again, this analysis does not suggest a pattern and practice of racial profiling within any of the three departments. This analysis is followed by a table representing the race/ethnicity and gender of San Antonio residents.

Traffic stops (2020) by race/ethnicity and gender of the drivers.

Use of Force

A review of the data reveals that incidents of physical force resulting in bodily injury subsequent to a stop are exceedingly rare in all three departments.

- Only 44 (0.03 percent) of the 138,180 stops conducted by the San Antonio Police Department included physical force.
- There were no stops conducted by the San Antonio Park Police and San Antonio Airport Police Departments that included physical force.

During 2020 the Department received five (5) complaints alleging racial profiling, three (3) of these complaints were related to traffic stops and all resulted in no disciplinary action. The other two (2) were police actions not related to traffic stops. One of these complaints resulted in disciplinary action. The San Antonio Police Department takes all complaints of racial profiling regardless of whether they are related to a traffic stop or other police action.

Based on our performance as presented above, I am confident that we have complied with the law to the fullest extent possible for the calendar year 2020 and have continued to improve our collection and analysis of the racial profiling data gathered.

.11 IMMIGRATION POLICY

- A. Officers will not refer persons to Immigration and Customs Enforcement (ICE) unless the person has a federal deportation warrant. National Origin, immigration status, ethnicity or race are not a basis for an arrest and officers will not base any arrest on those conditions.
1. The San Antonio Police Department, in conjunction with other entities, will assist crime victims and witnesses in obtaining U-Visas. The U-Visa is an immigration benefit that can be sought by victims of certain crimes who are currently assisting or have previously assisted law enforcement in the investigation or prosecution of a crime, or who are likely to be helpful in the investigation or prosecution of criminal activity.
 2. Arrested persons will have their identities verified by Bexar County Deputies at the Bexar County Jail. Decisions regarding deportation are not/will not be made by SAPD officers.
 3. Officers do not conduct background checks on everyone they encounter.
- B. Officers will verify identification and perform a background check on people to whom they are issuing a citation, legally detaining, arresting, or processing for magistration.
1. Officers may take into custody any person who cannot provide valid identification or sufficient information for an officer to confirm the person's identity.
 2. Valid identification includes, but is not limited to, state identification cards, driver's license, government IDs such as passports or military ID. The "Matricula Consular," issued by the Mexican Consulate, will also be considered an acceptable form of identification.
 3. Once identity has been confirmed, officers will decide whether to release a person who is being detained who is either a witness or the recipient of a citation, or based on probable cause, arrest the person.
- C. Officers will not detain and/or arrest an individual based on the fact or suspicion that they are in the United States illegally.
1. The enforcement priorities of the San Antonio Police Department are to protect public safety and foster community trust. The priorities do not include asking individuals for proof of citizenship or legal residency.
 2. Officers may not inquire into the immigration status of a victim of or witness to an alleged criminal offense unless the officer determines that the inquiry is necessary to:
 - (1) investigate the offense; or
 - (2) provide the victim or witness with information about federal visas designed to protect individuals providing assistance to law enforcement.
 3. Officers are authorized to arrest persons based on probable cause that a crime has been committed. Immigration status alone is not probable cause for an arrest.
 4. Officers having reasonable suspicion that a person or persons may be a victim or suspect in human trafficking will immediately notify a supervisor and the appropriate follow-up unit, and will handle matter in accordance with GM Proc. 713, *Human Trafficking*.

Informing and Educating the Public How to File a Racial Profiling Complaint with the San Antonio Police Department

The Texas Racial Profiling Law mandates that law enforcement agencies instruct the public how to file a racial profiling complaint. Toward this end, the San Antonio Police Department (SAPD) has instituted a program to address any concerns the public might have regarding the necessary steps involved in filing a racial profiling complaint. The SAPD currently provides information via their departmental website, www.sanantonio.gov/sapd that enumerates the procedures aimed at filing a racial profiling complaint. Information is also available in the lobby area of the police department headquarters and substations, respectively. Overall, the police department actively informs and promotes how to file a racial profiling complaint.

2.0 RACIAL PROFILING AND THE COMMUNITY

2.1 UNIT GOAL: The student will be able to identify logical and social arguments against racial profiling.

2.1.1 LEARNING OBJECTIVE: The student will be able to identify logical and social arguments against racial profiling.

- A. There are appropriate reasons for unusual traffic stops (suspicious behavior, the officer's intuition, **MOs**, etc.), but police work must stop short of cultural stereotyping and racism
- B. Racial profiling would result in criminal arrests, but only because it would target all members of a race randomly - the minor benefits would be far outweighed by the distrust and anger towards law enforcement by minorities and the public as a whole
- C. Racial profiling is self-fulfilling bad logic: if you believed that minorities committed more crimes, then you might look for more minority criminals, and find them in disproportionate numbers

- D. Inappropriate traffic stops generate suspicion and antagonism towards officers and make future stops more volatile - a racially-based stop today can throw suspicion on tomorrow's legitimate stop
- E. By focusing on race, you would not only be harassing innocent citizens, but overlooking criminals of all races and backgrounds - it is a waste of law enforcement resources

3.0 RACIAL PROFILING VERSUS REASONABLE SUSPICION

3.1 UNIT GOAL: The student will be able to identify the elements of both inappropriate and appropriate traffic stops.

3.1.1 LEARNING OBJECTIVE: The student will be able to identify elements of a racially-motivated traffic stop.

- A. Most race-based complaints come from vehicle stops, often since race is used as an inappropriate substitute for drug courier profile elements
- B. "DWB" - "Driving While Black" - a nickname for the public perception that a Black person may be stopped solely because of their race (especially with the suspicion that they are a drug courier), often extended to other minority groups or activities as well ("Driving While Brown," "Flying While Black," etc.)
- C. A typical traffic stop resulting from racial profiling
 1. The vehicle is stopped on the basis of a minor or contrived traffic violation which is used as a pretext for closer inspection of the vehicle, driver, and passengers
 2. The driver and passengers are questioned about things that do not relate to the traffic violation
 3. The driver and passengers are ordered out of the vehicle
 4. The officers visually check all observable parts of the vehicle
 5. The officers proceed on the assumption that drug courier work is involved by detaining the driver and passengers by the roadside
 6. The driver is asked to consent to a vehicle search- if the driver refuses, the officers use other procedures (waiting on a canine unit, criminal record checks, license-plate checks, etc.), and intimidate the driver (with the threat of detaining him/her, obtaining a warrant, etc.)

3.1.2 LEARNING OBJECTIVE: The student will be able to identify elements of a traffic stop which would constitute reasonable suspicion of drug courier activity.

- A. Drug courier profile (adapted from a profile developed by the DEA)
 1. Driver is nervous or anxious beyond the ordinary anxiety and cultural communication styles
 2. Signs of long-term driving (driver is unshaven, has empty food containers, etc.)
 3. Vehicle is rented
 4. Driver is a young male, 20-35

5. No visible luggage, even though driver is traveling
 6. Driver was over-reckless or over-cautious in driving and responding to signals
 7. Use of air fresheners
- B. Drug courier activity indicators by themselves are usually not sufficient to justify a stop

3.1.3 LEARNING OBJECTIVE: The student will be able to identify elements of a traffic stop which could constitute reasonable suspicion of criminal activity.

- A. Thinking about the totality of circumstances in a vehicle stop
- B. Vehicle exterior
1. Non-standard repainting (esp. on a new vehicle)
 2. Signs of hidden cargo (heavy weight in trunk, windows do not roll down, etc.)
 3. Unusual license plate suggesting a switch (dirty plate, bugs on back plate, etc.)
 4. Unusual circumstances (pulling a camper at night, kids' bikes with no kids, etc.)
- C. Pre-stop indicators
1. Not consistent with traffic flow
 2. Driver is overly cautious, or driver/passengers repeatedly look at police car
 3. Driver begins using a car- or cell-phone when signaled to stop
 4. Unusual pull-over behavior (ignores signals, hesitates, pulls onto new street, moves objects in car, etc.)
- D. Vehicle interior
1. Rear seat or interior panels have been opened, there are tools or spare tire, etc.
 2. Inconsistent items (anti-theft club with a rental, unexpected luggage, etc.)
