# CITY OF SAN ANTONIO PUBLIC WORKS DEPARTMENT STORM WATER UTILITY FEE APPEAL/CREDIT APPLICATION

## USE OF THIS APPLICATION

This application shall be used to appeal a user's storm water utility fee for residential and non-residential benefitted properties, as well as to request a credit for non-residential properties, in accordance with City Code Chapter 34-7. This is not a building permit application.

## ORDINANCE

Ordinance #2015-09-10-0761 amended and recodified in part, Chapter 34 of the San Antonio City Code. The ordinance revised and adopted rules for the City drainage utility, adopted a new rate design and schedule for storm water utility fees, exempted certain properties from drainage charges, and implemented a process to appeal the storm water utility fee. Ordinance #2016-09-29-0737 further amended Chapter 34 with an updated fee schedule and reclassification of triplex and quadplex properties as residential properties. Ordinance #2018-09-14-0656 amended Chapter 34 with an updated fee schedule.

Per Chapter 34, the service area for the Drainage Utility shall include all real property within the city limits of the City of San Antonio. The following property shall be **EXEMPT** from the storm water utility fee:

1. real property with proper construction and maintenance of a wholly sufficient and privately owned drainage system;
2. real property held and maintained in its natural state, until such time that the property is developed and all of the public infrastructure constructed has been accepted by the City;
3. a subdivided lot, until a structure or improvement has been built on the lot and a Certificate of Occupancy has been issued by the City;
4. real property owned by the State of Texas;
5. real property owned by public or private institutions of higher education; and
6. real property owned by the City of San Antonio constituting the Drainage System, including public streets, rights-of-way, facilities, and infrastructure that provide drainage service.

All other real property within the City shall be subject to the storm water utility fee, including but not limited to, religious organization properties, railroad yards, cemetery properties, county properties, federal properties, City properties other than those noted above, and school district properties.

## STEPS TO SUBMIT AN APPEAL OR APPLY FOR CREDITS

A property owner may apply for Credits or Appeal the Impervious Area assigned to a benefitted property. The applicant/owner shall have the burden of proof. In accordance with City Code Chapter 34-1117, the process for application is as follows:

1. Submit an Appeal or Credit Application to the Assistant Director or designee of Public Works. Appeals and Credit Applications must be in writing and include detailed supporting documentation.
2. Appeals and Credit Applications will be reviewed by the Assistant Director or designee within twenty (20) business days from the date of receipt.
3. Following the twenty (20) day review period, the Assistant Director or designee may request additional information necessary to make a determination. The owner/applicant may be required, at their own cost, to provide supplemental information such as survey data certified by a Texas Registered Professional Land Surveyor (R.P.L.S.), design data certified by a Registered Professional Engineer (P.E.) licensed to practice in Texas, or other documentation. Failure to provide requested information may result in denial of the Appeal or Credit Application.

4. The Assistant Director of Public Works, or designee, shall provide a resolution/determination to the owner/applicant, in writing, within ten (10) business days following review of the initial request. If the Appeal or Credit Application is approved, the Assistant Director or designee shall
5. order the reassignment of impervious area and the associated storm water utility fee, if any, to the benefitted property. Rate adjustments will be granted effective the next billing period. Any rate adjustments shall be prospective, but may be made retroactive for no more than three (3) billing periods prior to the receipt of the appeal.
6. If the Assistant Director or designee denies the Appeal or Credit Application, the owner/applicant may, within ten (10) days from the date of notification, further appeal the decision to the Director of Public Works, or designee. The appeal shall be in writing and include a brief and clear statement of the applicant/owner's argument and suggested remedy. The Director or designee shall have fifteen (15) business days from the date the appeal is received to review the appeal, make a determination, and notify the user.

**SUBMITTAL OF THE APPLICATION – COMPLETENESS REVIEW**

The review period for completeness is two (2) working days from time of submittal. If the application and all required documentation are included, the city review period will start the day the application was received. If the submittal package is not complete, the applicant/owner will be provided with a list of items, in writing, that need to be submitted and the city review period will start when the application is complete. Incomplete applications will remain with the city for a period of thirty (30) days. If the application is still incomplete after this time, the application will be considered abandoned.

**REQUIREMENTS FOR SUBMITTAL**

The following items are required for all submittals:

**Table 1: Completeness Checklist**

Applicant Use			Staff Use		
Submittal Items			Included	N/A	Included
1	Application for Appeal/Credit (filled out and signed)				
2	Location Map				
3	Aerial Photo				
4	Impervious Cover Map with impervious areas quantified and with other relevant base data shown (roads, parcels, etc.)				
5	Copy of latest SAWS Bill				
6	Other supporting documentation for Appeal or Credit (surveys, design plans, calculations, exhibits, etc.)				

**EXPIRATION OF APPLICATION**

This application shall become invalid if the applicant fails to respond to review comments within 180 days of receiving the review comments. The Assistant Director of Public Works, or his designee may grant, in writing, one or more extensions of time, for periods not more than 90 days each. The extension shall be requested in writing and justifiable cause demonstrated.

**STORM WATER UTILITY FEE CODES AND RATES**

The storm water utility fee rates are based on Impervious Area for residential properties and on Impervious Area and Percent Impervious Area for non-residential properties in accordance with City Code Chapter 34-1114 and current rates are provided below.

*Residential Properties* shall mean all benefitted properties within the service area used for single-family home, duplex, triplex, quadplex properties, or mobile home land use.

*Non-Residential Properties* shall mean all benefitted properties within the service area, other than Residential Properties.

**Table 2: Residential Storm Water Utility Fee Rates, FY 2019**

Residential Rate Category	Storm Water Code	Impervious Area (sq. ft.)	Monthly Fee (\$)
Tier 1	R1	≤ 2,750	\$3.75
Tier 2	R2	> 2,750 - 4,220	\$4.94
Tier 3	R3	> 4,220	\$10.45

**Table 3: Non-Residential Storm Water Utility Fee Rates, FY 2019**

Non-Residential Rate Category	Storm Water Code	Percent Impervious Area	Monthly Base Fee (\$)	Monthly Impervious Fee (\$ per 1,000 sq. ft.)
Tier 1	NR1	≤ 20%	\$67.30	\$0.31 per 1,000 sq. ft.
Tier 2	NR2	> 20% - 40%	\$67.30	\$0.45 per 1,000 sq. ft.
Tier 3	NR3	> 40% - 65%	\$67.30	\$0.58 per 1,000 sq. ft.
Tier 4	NR4	> 65%	\$67.30	\$0.73 per 1,000 sq. ft.

# CITY OF SAN ANTONIO STORM WATER UTILITY FEE APPEAL/CREDIT APPLICATION

## EXAMPLE CREDIT CALCULATION:

First, determine lot area, developed area, and impervious area. For this example, assume the following:

- A. *Lot Area = 500,000 sq. ft.*
- B. *Area of development within lot = 350,000 sq. ft.*
- C. *Impervious Area within lot = 300,000 sq. ft.*

Then, calculate percent impervious area:

D. *Percent Impervious Area = 300,000 sq. ft. ÷ 500,000 sq. ft. = 60%*

Determine Storm Water Code from Table 2:

E. *60% → Tier 3 → Storm Water Code NR3*

Determine standard monthly Impervious Fee

F. *Storm Water Code NR3 → \$0.58 per 1,000 sq. ft. impervious cover*

$$\frac{300,000 \text{ sq. ft.} \times \$0.58}{1,000 \text{ sq. ft.}} = \$174.00$$

Determine area of watershed treated by LID components.

G. *Area of treated watershed = 285,000 sq. ft.*

H. *Treatment Area Percentage:*

$$\frac{315,000 \text{ sq. ft.}}{350,000 \text{ sq. ft.}} = 90\%$$

Determine the water quality volume (WQV) captured:

- I. *In this example, assume LID components are put in place to treat 85% of the water quality volume captured from the treated area (G). Detailed LID design plans and calculations are required in an actual submittal.*

Net Water Quality Volume (WQV) = 85% x 90% treatment area = 76.5%

Determine the available Fee Reduction percentage based on Table 4:

- J. *76.5% is between 70% and 80%, so the available reduction is 10%.*

The impervious fee reduction is found by multiplying the impervious fee (F) and the fee reduction percentage (J):

K. *Impervious Fee Reduction = \$174.00 x 10% = \$17.40*

Determine the net impervious monthly fee:

L. *Net Impervious Fee = \$174.00 – \$17.40 = \$156.60*

Finally, determine the new utility fee:

M. *New Utility Fee = Base Fee + Net Impervious Fee = \$67.30 + \$156.60 = \$223.90*
